Consultations: With every session it is important that I understand your interests, the size of the portrait that you have in mind, the reason for the creation, an idea of how it will be displayed, who will be in the portrait, who is it for, and how you will be dressed.

Color harmony is so important to the success of the portrait. With larger groups, a family tree is necessary. The greater the investment, the more important the consultation.

Notes

If you are late, your session may not start on time, but it will end on time so we do not interfere with the following session.

Clothing: With infants, usually brighter outfits are in play. Family outfits and christening gowns may be used as well. I also like to show fingers and toes. Tasteful nude scenes are also a possibility. Others: Solid colors, no patterns or stripes, everyone should be wearing the same colors. Outdoors: Dress for the environment. You should look like you belong outside. I prefer earthtone colors. We should have talked about the scene and what people are wearing prior to the session.
